PROJECTS

Front-End Project : Cuddle Crew - Pet Care Services Website :
Technologies Used: HTML5, CSS3, JavaScript, and Bootstrap.
- Designed and implemented a responsive front-end interface for Cuddle Crew, utilizing HTML5, CSS3, Bootstrap, and JavaScript, enhancing user experience and accessibility.
- Implemented user-friendly interfaces, including booking forms, service listings, and pet care content

PHP Project : SlamBook - Your Memories, Your Digital Diary!
Technologies Used: HTML5, CSS3, Bootstrap 5, Javascript, Jquery, MySQL, Core PHP, WAMP Server.
- Developed a responsive Slam Book web application using PHP, MySQL, Bootstrap, and jQuery, enabling users to create, view, and manage personalized memory entries.
- Implemented robust form validation with jQuery Validation Plugin and facilitated CRUD operations, including profile picture uploads for a seamless user experience.

Laravel Project : Rating Management System :
Technologies Used: Core Laravel, PHP, MySQL, HTML5, CSS3, JavaScript, Bootstrap 5, WAMP Server.
- Designed a platform for food court management where vendors can register their food courts with images, and users can provide ratings and feedback.
- Admin has full control to monitor vendor activities and manage user feedback for efficient platform operations.

Wordpress Project : Rider Vibe - E-commerce Platform for Motorcycle Enthusiasts :
Technologies & Plugins Used : WordPress, Woostify, Elementor, WooCommerce, Contact Form 7.
- Designed and developed "Rider Vibe," an e-commerce platform for motorcycle enthusiasts, offering a wide range of riding apparel and accessories for men and women.
- Focused on user-friendly navigation, secure transactions, and a fully responsive design to enhance shopping experience across all devices.

TRAINING AND INTERSHIPS

Xceller IT Services - PHP Industrial Training.   **(July 2024 - Jan 2025)**
